

- **Isaac is a great teacher. I believe next semester will be a lot more successful for him and his students. He has been very helpful and understanding of each student's specific needs.**
- **He has been very great and extremely knowledgeable I have enjoyed this class.**

(All wording and spelling per student)

- This is my first social science class ever. I thoroughly enjoyed this class, teacher was very co-operative and willing to help student.
- The main thing was technology for this class. We had a lot of issues resulting in not being able to post work online, e-mail, and talk to each other.
- Smart thinking was bad....too much waiting for me...
- I really enjoyed this class with Mr. Emrick. He is a wonderful teacher. I learned a lot from his class.
- There were a large amount of technical difficulties that forced the class to delay or cancel course work, that should have been fixed faster, but that's more of a university problem than a class one.
- Please do not give so much material, things and writing papers to do because students can't catch up with everything. They focus normaly on one writing that they were not able to do some of other writing/papers in this class. The teacher is so approachable and intelligent in what he is doing. Able to explain thought in a sense student was able to understand. He go to the level that student is not scared/worried to ask question. Good job!
- I had a hard time at first especially with writing papers (APA, MLA ETC) He was always there to help the students out whether it was for paper or other questions. He was always funny and cheerful in class that never made the students bored. He made the classes more interesting with humor, real life examples, videos and powerpoints. I will be more than happy to take future classes with this instructor.
- I learned a lot and this class helped with my writing skills.
- This evaluation is really long. I really enjoyed this course and learned new ways of thinking. I kinda wish I got papers back sooner so I could see what was wrong and improve on it in my next paper.
- I felt this class was held back by unmotivated students, but the instructor was great.
- The technology failed to work to expectations. eLearn is a pain to access and use.
